

CARE OF YOUR SUNBEAM AUTOMATIC MIXMASTER MIXER

It is important to follow these instructions about oiling to insure the most satisfaction from your MIXMASTER.

During the first month of use, oil motor bearings 1 and 2. Use a good light machine oil. Put 2-3 drops of oil in holes 1, 2. DO NOT PUT MORE THAN ONE DROP OF OIL IN 3. When oiling 4, BE SURE to place two drops of oil on the outer edge of sleeve opening.

Under heavy usage these parts should be oiled once every month. Do not OVEROIL.

If bowl does not revolve freely, remove bowl and turntable, then oil built-in ball bearing "A" lightly.

All electric motors get warm when running, and warmth will increase as load on motor is increased. The temperature rise causes no harm to mechanical or electrical parts. Cord will discolor motor housing if wrapped around motor while hot.

Note: Always mention Model number when requesting service or parts for MIXMASTER. See model number stamped on bottom of MOTOR.

PARTS FOR YOUR SUNBEAM AUTOMATIC MIXMASTER
